Art Unit: 1617

DETAILED ACTION

The claims after claim 15 in the instant application are numbered 11-20. A call to Ms. Julie Blackburn (attorney) was made on Jan 22 2007 by the examiner and it was established that claims which are numbered as 11-20 after claim 15 will be renumbered to 16-25. Claims 1-25 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25 (in part), drawn to a cosmetic composition containing a silicone resin polymer comprised of M units in combination with Q and a method for improving the finish of a cosmetic composition, by formulating such composition with a silicone resin comprised of M units in combination with Q, classified in class 424, subclass 401.
- II. Claims 1-25 (in part), drawn to a cosmetic composition containing a silicone resin polymer comprised of M units in combination with T and a method for improving the finish of a cosmetic composition, by formulating such composition with a silicone resin comprised of M units in combination with T, classified in class 424, subclass 401.
- III. Claims 1-25 (in part), drawn to a cosmetic composition containing a silicone resin polymer comprised of M units in combination with QT and a method for improving the finish of a cosmetic composition, by formulating such composition with a silicone resin comprised of M units in combination with QT, classified in class 424, subclass 401.

Art Unit: 1617

The inventions are distinct from each other because of the following reasons:

Inventions of Groups I –III are related to each other as cosmetic composition and a method for improving the finish of a cosmetic composition but they differ in the silicone resin polymer units as having MQ or MT or MQT.

The searches of Groups I -III may be overlapping but there is no reason to believe that the searches would be co-extensive. The search required for Group II is not required for Group I, and search required for Group III is not required for Groups I or II and restriction for examination purposes as indicated is proper. The examiner will be focusing on the patentability of the method and the composition of MQ silicone resin polymer for Group I, MT silicone resin polymer for Group II and MQT silicone resin polymer for Group III. The search for all inventions would place an undue burden on the Office in view of the corresponding diversity in the field of search for each.

The application contains claims directed to patentably distinct species of the claimed invention. The search for each compound would represent an undue burden on the office in view of the different classes to be searched. If Applicant elects Group I or II or III applicant is required to elect a species of the copolymer.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 1617

Control Number. 10// 04,50

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1617

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C 103(a) of the other invention.

Election

A telephone call to the attorney is not required where 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since the examiner knows from past experience that written restriction is preferred, a telephone election was not made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Umamaheswari Ramachandran whose telephone number is 571-272-9926. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1617

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
